**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,3,5-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Kubota EP 1 132 842 A2 ('842) (submitted in IDS).

Considering claim 1, Kubota disclose a system comprising a) a plurality of mobile communication devices (see paragraph 0021); b) each communication device being provided with at least one sensor and a sensor control section for performing measurements (see paragraph 0024); c) a cellular communication network structure for the mobile communication (see paragraph 0060); d) a server provided with communication means for receiving measurement data from a plurality of mobile communication devices and for sending measurement instruction to respective sensor control section of the mobile communication devices (see paragraph 0047).

Considering claim 3, Kubota discloses the limitation of this claim (see paragraph 0042).

Art Unit: 2612

Considering claim 5, Kubota discloses the limitation of this claim (see paragraph 0009).

Considering claim 6, Kubota discloses the limitation of this claim (see paragraph 0060).

Considering claim 7, Kubota discloses the limitations of this claim (see paragraph 0010, 0060).

Considering claims 8-10, Kubota discloses the limitation of this claim (see paragraphs 0026 and 0060).

Considering claim 11, Kubota discloses the limitations of this claim (see paragraphs 0011-0012).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2,4, are rejected under 35 U.S.C. 103(a) as being unpatentable over Kubota '842.

Art Unit: 2612

Considering claim 2, Kubota does not specifically recite the sensor control section is programmable by the server. However, one of ordinary skill in the art readily recognizes it is known in the art to use smart sensor having means to be electronically programmed. Therefore, it would have been obvious to one of ordinary skill in the art to use programmable sensors in the Kubota system because Kubota discloses the use of memory means for storing data received from a remote center (see paragraph 0023).

Considering claim 4, the limitation of this claim is interpreted and rejected as stated in claim 2.
